Main Welcome Tab:

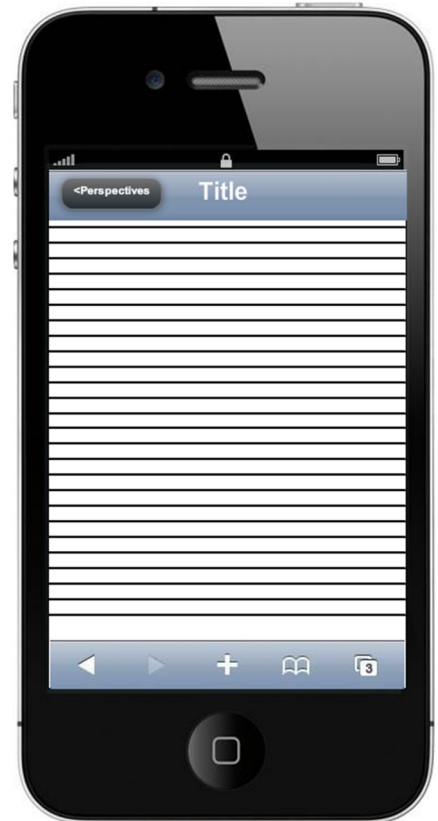

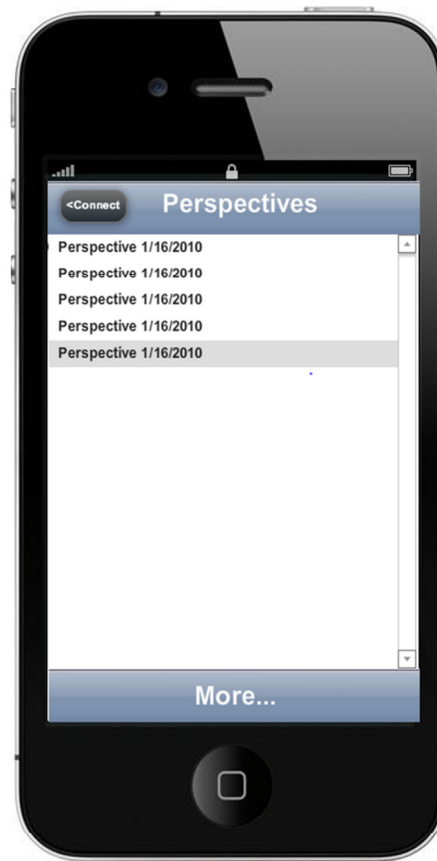

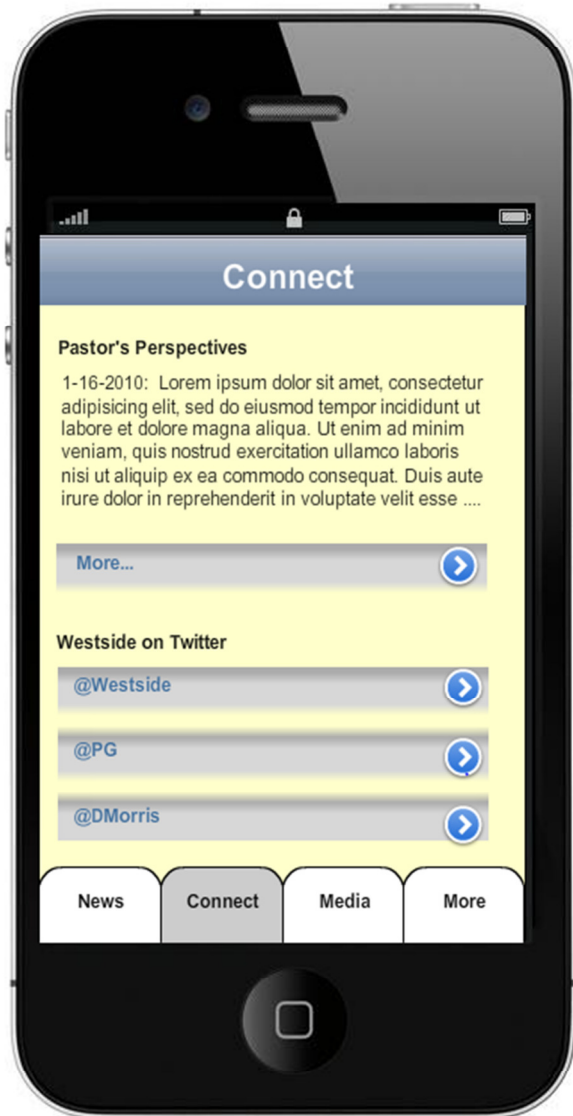

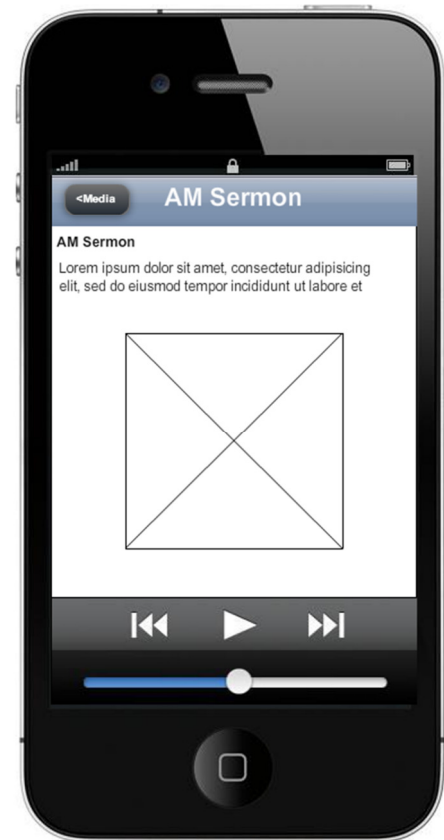

- Contains an ImageView or Media Player that displays an image that switches with animation periodically
- In Bulletin or Website-like fashion displays important information about events and happening at the Church during the current week.
  - By Default contains a backup screen preloaded with main meeting times throughout the week that don't normally change from week to week (AM/PM services, Church Hours, etc.)
- Could Contain other Pictures or Information as necessary.

Connect Tab:

- Top of the starting page is the beginning of the text for the most recent Pastor's Perspective with a GroupTableView that will direct the user to be able to read the rest of the article and select previous articles.
- Also on the page is a GroupTableView containing all the twitter accounts for westside and potentially a Contact Us Group as well
- Selecting More… will take the user to the "Perspectives" page via a Navigation Bar, this will list the N most recent Perspectives with the option to load more if needed.
- Selecting a particular perspective will take the User to a Reading page via the Navigation bar, it contains a toolbar allowing the user to share the blog with others or email it to themselves

Media Tab

- Each selection of the Segmented Control will bring up a description of the PodCast/Video Feed and followed by a list of the available streams.
- A "Tab Badge" will be added to the Media tab for each new podcast or will display "Live" if a live broadcast is playing.
- Audio will play in the app (maybe in background thru iPod), video and live will open a media player that will be full screen
- Pressing the Arrow instead of the row will bring up a description pane about the podcast including the length and date, etc.
- Maybe include a refresh button at the top bar.

More

- The More tab contains anything else that doesn't fit into News, Connect, or Media.
- Buttons can be added for eGiving, Buying Tickets for Events, Submitting prayer requests, etc.
- A MapView or Image of a map will be displayed under a basic "Address-Book/Phonebook" listing for the church.
- Clicking on eGiving and other buttons that link to web services will launch a new Screen with a webview and navigation bar (In-App, not launching Safari)
